Address
Piroć, Serbia

Experience

Oct 2024 – Present

NF INNOVA

Front-end Developer

I worked on frontend development for several major banking clients, including [Raiffeisen](#), [AIK](#), [OTP](#), and [APS](#). My role involved improving performance, cleaning up [legacy code](#), and introducing [ES6+ standards](#) to modernize existing systems. I used [JavaScript](#) ([Knockout.js](#), and [React](#)) daily to build new features and ensure everything ran smoothly. I also simplified the way we write project documentation by integrating [AI tools](#).

Jan 2022 – Feb 2024

OCTOPUS CLOUD

Front-end / Full-stack Developer

I started as a front-end developer, turning detailed [Figma designs](#) into clean, [pixel-perfect Angular](#) interfaces. I focused on writing modular, maintainable code, improving both scalability and developer efficiency. Over time, I transitioned into a [full stack](#) role, where I worked on backend logic using [C# / .NET](#). This shift allowed me to contribute across the stack and deepen my understanding of application architecture, while continuing to refine the user experience on the frontend.

[Project Showcase](#)

Jun 2018 – Dec 2021

KATIPULT

Front-end / Full-stack Developer

At Katipult, I worked on both maintaining legacy systems and developing new features tailored to client needs. I used [Vue.js](#), [React](#), [Laravel](#), and [HubSpot](#) across various projects, and regularly migrated and optimized pages using [WordPress](#) or our internal [CMS](#). I was also part of the [E2E \(end-to-end\)](#) testing team, where I wrote and maintained automated tests using [Codeception](#) to help ensure product stability and reduce regressions. This role required a balance of frontend precision and strong testing discipline to keep complex client-facing platforms running smoothly.

Side Projects & Contributions

Jun 2021 – Jan 2022

UDOMI LJUBIMCA

Frontend Developer (Open Source)

Worked on a [React](#)-based pet adoption platform, improving frontend [architecture](#), [refactoring code for performance](#), and restyling the UI with [SASS](#). Collaborated in a volunteer team and contributed to key technical decisions.

[Project Showcase](#)

Jan 2020 – Jun 2020

RENECTERE

Frontend Developer (Part-time)

Built a custom website builder using [Bulma](#), [HTML](#), [SASS](#), and [JavaScript](#), aimed at helping non-technical users create web pages easily. Focused on component-based architecture and user-friendly design.
