JOVAN JONIC

FRONT–END DEVELOPER

EXPERIENCE

Front-end Developer (Angular / .Net)

Octopus Cloud (Jan 2022 - Feb 2024) - Full Time

I focused on implementing a pixel-perfect design using Figma, as well as working on the project's logic side. During my first year at the company, I primarily worked with Angular and SASS, but starting in 2023, I switched to working on the back-end using .Net.

Front-end Developer (SASS / JQyery / Laravel)

Katipult (Jul 2018 - Dec 2021) - Full Time

Maintain and provide bug fixes for existing clients while simultaneously developing and implementing new features. Additionally, I ensure pixel-perfect design by transferring clients' marketing pages to WordPress or our to internal solution.

Front-end Developer (React)

Udomi Ljubimca (June 2021 - Jan 2022) - Open Source

I contributed to an open-source React project aimed at rescuing pets. My main responsibilities included working on the project architecture, implementing SASS for styling, and refactoring the codebase to improve its overall quality.

Front-end Developer (HTML / SCSS)

Billy Smith Media (Sep 2016 - Feb 2017) - Full time

Worked on high-quality websites by converting designs to pixel-perfect HTML. My expertise in HTML, CSS (including SASS), and JavaScript, combined with my attention to detail, ensured that all projects met the highest standards of quality and user experience.
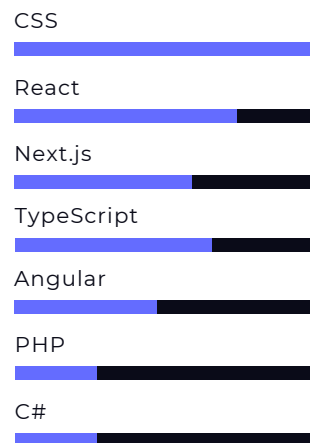

ABOUT

I am front-end developer with back-end experience (PHP and C#). My skill set includes working with popular front-end frameworks / libraries like React, Next.js, Angular, and Vue. I specialize in creating pixel-perfect designs, ensuring a high level of precision in my work.
